PROJECTS

1. **World Layoffs Data Cleaning (SQL)**
   - Cleaned and standardized dataset by **removing duplicates, fixing null values, and formatting industries/dates**
   - Improved **data accuracy and reliability**, enabling meaningful analysis across industries and geographies
   - Delivered a structured dataset for **trend analysis on layoffs by country, sector, and company stage**
2. **Pizza Sales Analysis (SQL)**
   - Wrote **SQL queries** to calculate total revenue, order volumes, and category-wise performance
   - Identified **top 5 most-ordered pizzas and top 3 revenue generators**, guiding menu and pricing strategies
   - Analysed **ordering patterns by time of day**, supporting efficient staffing and marketing campaigns
3. **Zomato Insights Dashboard (Power BI)**
   - Built a **Power BI dashboard** integrating **KPIs** such as orders, ratings, cuisines, and outlet performance
   - Applied **DAX measures and filters** to provide drill-down insights into customer and restaurant behaviour
   - Highlighted **top-performing outlets and cuisines**, supporting Zomato's **marketing and expansion strategies**
4. **Coffee Shop Sales Dashboard (Excel)**
   - Developed an **interactive Excel dashboard** with Pivot Tables, charts, and slicers to track daily, monthly, and seasonal sales
   - Analysed **top-selling products, peak hours, and location performance**, enabling better promotions and staffing decisions
   - Improved **inventory planning and revenue optimization** through outlet-level comparisons
